$\Delta\tau_{xy}$ [mPa], common scale
STORAGE [J/m]
Bulk: 1.063421 → 1.063421
Projection defect: +4.401e-11
Cohesive: 0.0021194
Geometry / I change: -3.773e-10
New records: 0; fracture change: 0
SHEAR WEAK LOAD [Pa m]
Overlap measure change: +0.00172193
Added surface: +203.732
Projection defect: -5.193e-08
Added friction load: +250 Pa m
Cohesive: +1.31e-09; residual: -46.267
$\tau_{xy} = T_{xy} - Zh(\phi)/I$
T is auxiliary history; τ is physical stress.
No time or phase evolution; no equilibrium claim.
